

REMARKS

By the above amendment Applicant has addressed the outstanding rejections and, in particular, moved away from any reliance regarding silicon substrate, amorphous oxide material, monocrystalline perovskite, etc. In this regard the patent application is submitted to be distinct from the Motorola "bulk filing" applications and instead rely for patentability upon the remaining elements in the claims, for example a monocrystalline compound semiconductor material, an antenna, a source component, an interconnect, etc.

In view of the above amendments, Applicants submit that the application is in condition for allowance, and early notification to this effect is respectfully requested.

Respectfully submitted,

OBLON, SPIVAK, McCLELLAND,
MAIER & NEUSTADT, P.C.
